

Task 14.4 Medical Billing & Revenue Dashboard

Report

1. Overview

This report presents a comprehensive analysis of the **Medical Billing & Revenue Dashboard**, focusing on claim processing efficiency, revenue generation, reimbursements, and outstanding payments. The dashboard enables stakeholders to monitor financial performance and identify revenue leakage areas.

2. Key Performance Indicators (KPIs)

Total Claims	Approval Rate	Denial Rate	Total Bill Amount	Total Reimbursement	Outstanding Amount
1K	0.33	0.33	297K	201K	96K

- **Total Claims:** 1,000
- **Approval Rate:** 33%
- **Denial Rate:** 33%
- **Total Billed Amount:** 297K

- **Total Reimbursement (Paid):** 201K
- **Outstanding Amount:** 96K

Insights:

- Only one-third of claims are successfully approved.
- A significant portion of revenue (96K) remains outstanding, indicating collection inefficiencies.

3. Revenue Analysis

Billed vs Reimbursement Trend

- Revenue peaked in **June (70K billed)**.
- Reimbursements consistently lag behind billed amounts.
- The gap between billed and paid indicates delayed or partial collections.

Key Insight:

There is a consistent difference between billed and reimbursed amounts, highlighting inefficiencies in the revenue cycle.

4. Outstanding Amount Analysis

- Outstanding amount increased from **May (20.7K)** to **June (22.9K)**.
- Gradual improvement observed from July to September.
- Significant drop in September (11.8K) indicates better recovery or fewer pending claims.

Key Insight:

Recent months show improved collection performance, reducing outstanding balances.

5. Claims Status Distribution

- Paid: ~33.4%
- Under Review: ~32.8%
- Denied: ~33.8%

Key Insight:

Claims are almost evenly distributed across statuses, indicating delays in processing and a high denial rate.

6. Insurance Type Analysis

- Commercial insurance has the highest number of claims.
- Medicare and Self-Pay also contribute significantly.

Key Insight:

Revenue is highly dependent on insurance providers, with Commercial plans leading.

7. Accounts Receivable (AR) Analysis

- Payments are distributed across multiple AR statuses:
 - On Hold
 - Partially Paid
 - Open
 - Closed
 - Denied
 - Pending

Key Insight:

A large portion of payments is still in intermediate stages (On Hold, Pending), impacting cash flow.

8. Slicers (Filters) Used in Dashboard

The dashboard includes multiple slicers to enable dynamic and interactive data analysis. These filters allow users to drill down into specific segments and gain deeper insights.

The image shows a 'Date of Service' slicer interface. It has a title 'Date of Service' at the top. Below the title are two date input fields. The first field contains '01-05-2024' and the second field contains '20-09-2024'. Each field has a small calendar icon to its right. Below the date fields is a horizontal range bar with two circular endpoints, representing the date range from May 1, 2024, to September 20, 2024.

1. Date of Service

- Type: Range (Between) slicer
- Purpose: Filters data by time (monthly/period-wise analysis)
- Usage: Helps analyze trends in billing, reimbursement, and outstanding amounts over time

This is an identical duplicate of the first image, showing the 'Date of Service' range slicer with the same dates and range bar.

2. Insurance Type

- Type: Dropdown slicer
- Purpose: Filters data based on payer category (Commercial, Medicare, Self-Pay, etc.)
- Usage: Enables comparison of revenue and claims across different insurance providers

This is another identical duplicate of the first image, showing the 'Date of Service' range slicer with the same dates and range bar.

3. Claim Status

- Type: Dropdown slicer
 - Purpose: Filters claims by processing stage (Paid, Under Review, Pending)
 - Usage: Helps track claim processing efficiency
-

4. AR Status (Accounts Receivable Status)

- Type: Dropdown slicer
 - Purpose: Filters claims based on receivable stages (Open, Closed, Pending, etc.)
 - Usage: Assists in monitoring outstanding payments and collection stages
-

5. Reason Code

- Type: Dropdown slicer
 - Purpose: Filters claims based on denial or processing reasons
 - Usage: Helps identify root causes of claim denials and issues
-

9. Conclusion

The dashboard highlights critical challenges in the medical billing process:

- High denial and pending claim rates
- Significant outstanding revenue
- Delays in reimbursement

Recommendations:

- Improve claim validation
- Focus on denial reason analysis
- Strengthen follow-up processes
- Optimize revenue cycle management
